Gaussian Modern

A quieter character. An open page.

Generous lowercase forms meet compact bracketed serifs, restrained terminals, and a distinctive capital A. The aim is a welcoming scholarly voice, with enough individuality to belong to this family.

REGULAR

Clear thought, carefully expressed.

ITALIC

Clear thought, carefully expressed.

SEMIBOLD

Clear thought, carefully expressed.

SEMIBOLD ITALIC

Clear thought, carefully expressed.

FOUR TEXT STYLES / OPEN TYPE MATHEMATICS / EDITABLE MASTERS

This is a working first release. The specimen uses the supplied font files throughout; its appearance is a design proof, not evidence of improved learning.

At the size of a sentence

9 PT TYPE / 12 PT LINE SPACING

A clear account of an idea begins with a steady rhythm. The reader moves from a sentence to a number, from a definition to a diagram, and then back to the argument. A useful typeface gives these changes enough structure to feel orderly, while leaving room for the individual forms to remain distinct.

10 PT TYPE / 14 PT LINE SPACING

A clear account of an idea begins with a steady rhythm. The reader moves from a sentence to a number, from a definition to a diagram, and then back to the argument. A useful typeface gives these changes enough structure to feel orderly, while leaving room for the individual forms to remain distinct.

12 PT TYPE / 17 PT LINE SPACING

A clear account of an idea begins with a steady rhythm. The reader moves from a sentence to a number, from a definition to a diagram, and then back to the argument. A useful typeface gives these changes enough structure to feel orderly, while leaving room for the individual forms to remain distinct.

EMPHASIS IN CONTEXT / 10 PT

A precise distinction. An italic phrase can introduce *a term of art* without changing the tone of the page. Semibold can identify a conclusion, while the regular face carries the discussion. The forms in *a gentle curve* retain a true italic structure.

LATIN ACCENTS

Ångström · façade · naïve
Český · déjà vu · Straße
Œuvre · piñata · smörgås

All three reading samples use the same master. Separate caption and display optical sizes are not part of this release. Compare at 100% or print at actual size.

From prose to an equation

For a smooth function $f\colon \mathbb{R} \to \mathbb{R}$, the derivative describes local change. The mathematical italic alphabet, operators, and larger delimiters share the page with the text family.

$$f'(x) = \lim_{h \to 0} \frac{f(x+h) - f(x)}{h}, \qquad \int_0^1 x^2 \, \mathrm{d}x = \frac{1}{3}.$$

$$\sum_{k=0}^{n} \binom{n}{k} x^k y^{n-k} = (x+y)^n, \qquad x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}.$$

SCRIPTS, RADICALS, AND DELIMITERS

$$A = \begin{pmatrix} a_{11} & a_{12} \\ a_{21} & a_{22} \end{pmatrix}, \qquad \left\{ \frac{1 + \frac{x}{y}}{1 + \frac{y}{x}} \right\}, \qquad \sqrt[3]{1 + \frac{1}{1 + x^2}}.$$

GREEK AND MATHEMATICAL ALPHABETS

$$\alpha \ \beta \ \gamma \ \delta \ \varepsilon \ \epsilon \ \theta \ \vartheta \ \lambda \ \mu \ \nu \ \xi \ \pi \ \rho \ \sigma \ \varphi \ \phi \ \omega$$

$$\mathbb{R} \subset \mathbb{C} \qquad \mathcal{ABCXYZ} \qquad \mathbf{ABCxyz} \qquad \boldsymbol{ABCxyz}$$

$$x \ \nu \ \nu \quad 0 \ O \ \varnothing \qquad \widehat{ABC} \qquad \widetilde{xyz} \quad a \neq b \quad x \notin A \quad x \mapsto x^2$$

LARGER CONSTRUCTIONS

$$\begin{pmatrix} 1 & 2 \\ 3 & 4 \\ 5 & 6 \\ 7 & 8 \\ 9 & 0 \\ 1 & 2 \end{pmatrix} \qquad \left\{ \begin{matrix} x \\ x^2 \\ x^3 \\ x^4 \\ x^5 \\ x^6 \end{matrix} \right\} \qquad \sqrt{\frac{1}{\frac{1}{\frac{1}{1+x}}}}$$

Typeset with XeTeX and unicode-math. The companion includes an OpenType MATH table, larger operator variants, vertical assemblies, and wider script forms. It has not yet been qualified across other equation engines.
